(54) **Anti-vibration electrical connector.**

(57) An electrical connector (10) is disclosed for mounting in an aperture in a panel or the like and includes a housing (12). A yieldable anti-vibration arm (24) projects from the housing (12) for engaging the panel when the connector is mounted in the aperture in the panel to prevent vibration between the connector and the panel. A recess (38) is formed in the anti-vibration arm (24) at a location to relieve stress in the arm during yielding thereof.

CATEGORY OF CITED DOCUMENTS

X : particularly relevant if taken alone
Y : particularly relevant if combined with another document of the same category
A : technological background
O : non-written disclosure
P : intermediate document

T : theory or principle underlying the invention
E : earlier patent document, but published on, or after the filing date
D : document cited in the application
L : document cited for other reasons

& : member of the same patent family, corresponding document
