(54) **Battery saver module for automobile courtesy and illuminated entry lamps.**

(57) A battery saver module (12) for controlling courtesy and illuminated entry lamps having inputs for receiving input signals from door handle sensors (20), a trunk sensor (22), and an ignition switch (18) and first output connected to illuminated entry loads (28) and a second output connected to courtesy lamp loads (26). A control circuit selectively activates the first and second output responsive to input signals and includes a first timer (47) for deactivating the first output after a first time period and a second timer (48) for deactivating the second output after a second time period.
