(54) **Bale wrap kit for compressed, resilient fibers.**

(57) A method for wrapping a bale of compressed, resilient fibers (12) comprises the steps of: providing a bale wrap kit (10). The kit (10) includes at least two pieces (14,18). Each piece, when joined with the other piece, is adapted for substantially enclosing and containing the bale of compressed, resilient fibers (12). Velcro-type fasteners (2,30,34,36) are located along an edge portion (20,28) of each piece (14,18) and are adapted for joining the pieces (14,18) to one another. Uncompressed, resilient fibers are provided. A portion of the uncompressed, resilient fibers are surrounded with the kit. Those fibers are compressed, and the velcro-type fasteners are engaged.

CATEGORY OF CITED DOCUMENTS

X : particularly relevant if taken alone
Y : particularly relevant if combined with another document of the same category
A : technological background
O : non-written disclosure
P : intermediate document

T : theory or principle underlying the invention
E : earlier patent document, but published on, or after the filing date
D : document cited in the application
L : document cited for other reasons

& : member of the same patent family, corresponding document
