(54)

Photographic assembly.

(57)

A photographic assembly which comprises an opaque photographic base on which is coated at least one photographic emulsion layer, there being coated on the topmost emulsion layer a gelatin supercoat layer which comprises from 5 to 35% by weight of colourless polymer particles which have a

glass transition temperature (T_g) of at least 40 °C and have a particle size of not more than 90nm and have substantially the same refractive index as gelatin.

The object of the coating is to produce a high gloss and reduce the haze.
