- System for connecting together vertical and horizontal elements within a prefabricated structure.
- The A system for connecting together vertical elements (11) and horizontal elements (10) within a prefabricated structure, in which said elements (10, 11) comprise aligned holes through which reinforce-

ment rods (15) embedded in a consolidation casting

Preferably, said holes are defined by sheaths (12, 13) incorporated into said elements (10, 11).
