(54) Gas burner having variable positioning and cooking hob incorporating such a burner

(57) Gas burner (1) is described, arranged on a cooking hob (P) for the heating of containers placed on the latter, of the type comprising a base body (10), gas supply means (12), a removable body (15) upon the upper extremity of which a flame divider element (18) is placed. The main characterised of the described burner is that said removable body (15) is realised with a form of such that said flame divider (18,19) is arranged in an

off-centred position compared to said base body (10) and that coupling means (13,20) are provided between said base body (10) and said movable body (15) which allow said removable body (15) the selection of at least two different working positions, in function of the type of container to be heated on said burner and/or in function of the container to be heated placed upon a second burner of said cooking hob (P).
