(54) **Glove and method of producing same**

(57) The outer edge 26a of the little finger bag portion 24 and the little finger - associated edge 26b of the glove base portion 16 are formed by the folding of a cut material 10. Seam allowances 34a and 34b are sewn together in a region of the back side of the glove base portion 16 which is associated with the fingertip side rather than with the slit 36, whereby the ends of the cut material 10 are joined together. Thereby, the slit 36 is formed on the back side of the glove base portion 16 to extend from the insertion opening toward the fingertip side.
