(54) A binding machine using a tape and a binding tape

(57) The binding machine (1) using the tape employs the binding tape (6) having the bonding tape (7) coated on its rear surface with the adhesive and consists of the boring mechanism (2) for boring the aperture (*h*) through the papers (*P*) to be bound and the binding

mechanism (3) which winds the bonding tape (7) around or halfway around the portion between the bored aperture (*h*) and the end surface (*p*₁) of the papers (*P*) and so on to be bound and bonds the bonding tape (7) there-to.
