(54) **Improved concealed device for wall-mounting an item of wall furniture**

(57) A concealed device for wall-mounting an item of wall furniture comprising, in combination: a plate (11) to be fixed to the furniture item, a coupling element (27) secured to said plate (11) and arranged to engage a support member (28) fixed to the wall, a first screw (19) operable by a bevel gear pair (22, 23) acting between said plate (11) and said coupling element (27) to adjust the vertical position of this latter relative to the plate (11), and a second screw (20) carrying at one end said coupling element (27) and at its opposite end a slot (26) for a screwdriver to adjust the distance between the coupling element (27) and the plate (11). According to the invention said screw (19) and said screw (20) lie in the same plane and extend perpendicular to each other from a slide (12) movable along guides (13) provided on and parallel to the plate (11). The screw (19) screwing through a threaded hole (21) in the plate (11) and the screw (20) screwing through a through hole (25) in the slide (12).
