(54) **Switch**

(57) A fixed terminal (12) having a fixed contact (20A) and a L-shaped moving member terminal (13) are mounted through oblong openings of a bottom plate of a switch case (11) at each one end. A moving switch-plate (16) having a moving contact (20B) at one end part is suspended on the other end part of the L-shaped moving member terminal (13) with a change-over member and a U-shaped leaf spring (15) so that the longitudinal direction of the moving switch-plate (16) is substantially parallel to the bottom plate of the switch case (11), and that the other end of the moving switch-plate (16) is moved by a slide member (17) to operate the switch.
