(54) Holding cabinet

(57) A holding cabinet or the like especially intended for location in water splashing areas, for example shower cubicles, comprising a cabinet body (1) and a movable door (2) turnable relative to the cabinet body (1). The door (2) has a convex side and a concave side carrying at least one shelf (4) which is fitted to move into the cabinet body (1) thereby exposing its concave side and the at least one shelf (4). The cabinet body (1) and door (2) are provided, at their upper and lower ends, with mutually cooperating journalling means which, as known per se, are arranged to guide the turning movement of the door. The journalling means for at least the cabinet body are formed in separate end pieces (6) attached to the cabinet body (1).
