(54) Improvements in and relating to scaffolding systems

(57) A scaffolding system of the type comprising interconnected vertical legs (2) and horizontal space frames (4) is described. The legs (2) are provided with socket members (10) and at least one of the chord members of each space frame (4) is provided at either end thereof with first attachment means (20) comprising a pin (28) for insertion into a socket member (10) of a leg to which it is to be attached. Each socket member comprises a ring (16) mounted such as to also be capable of receiving a C-shaped end fitting (48) around a portion thereof.
