(54) **Container made from a blank of lightweight foldable sheet material**

(57) A blank made of cardboard, paperboard or similar lightweight foldable sheet material, for making a container, the blank comprising a panel (1) for forming a floor of the container, and two wall panels (4,5) hingedly connected to the said floor panel for forming wall parts of the container when erected relative to the floor panel, the said floor panel being formed with suitable fold lines (9) to enable two outward parts (12) thereof, hingedly connected to the respective wall panels as aforesaid, to be folded away between an intermediate part (10) thereof and the end regions of the wall panels, whereby, upon their said erection, the wall panels may be wrapped around the said intermediate part of the floor panel and interconnected to form adjacent wall parts of the container.
