(54) **Brush suitable for mounting on a sweeping machine**

(57) Brush suitable for mounting on a sweeping machine, said brush comprising a disc (1) being in a horizontal plane when in use and being provided with a number of receiving bushes (4) distributed across its circumference, enclosing an angle with the plane of the disc. A sleeve (14) being clamped onto a sweeping member in the form of a steel cable (15) or strips (17), which is slidable into each receiving bush (4). Each re-

ceiving bush (4) is provided with a collar (6) against which the sleeve (14) will abut when it slides into the receiving bush (4), so that the sleeve (14) is prevented from being pushed out of the receiving bush (4). At a distance from the collar (6), the receiving bush (4) has a stop member (7) protruding inwards under spring force, and retaining the sleeve (14) in the receiving bush. The receiving bush (4) and the sleeve (14) can have a square cross-section.
