(54) Dishwashing machine with height adjustable baskets

(57) Dishwashing machine of the type comprising a removable basket (2), where during its use rollers (10) associated to the basket side walls (2) are engaged in guides (13) associated to the side walls of a washing tub housing the basket, said dishwashing machine comprising a device for height adjustment of said basket (2) within said tub, said device comprising a first section (1) related to the basket (2) and a second section (9)

related to the rollers (10), where height adjustment is obtained through a translation motion of said first section (1) related to the basket (2) with respect to said second section (9) related to the rollers (10). Articulation levers (11), pivoted between said first section (1) and said second section (9) are provided, so that said translation motion is substantially a circular motion.

FIG. 1
