### (54) Hinge arm for furniture or the like with cam means for movement thereof in the longitudinal direction

(57) Arm (1) for hinges for furniture and the like, comprising a body (10) and a fastening element (30) provided with a locking device (40) for coupling the arm (1) to a base-piece (50) fixed to the furniture, wherein there is provided at least one cam element (80)

arranged between said body (10) and said fastening element (30), the operation of said cam element being designed to cause a translation of the body (10) relative to the fixed base-piece (50) in the longitudinal direction (X-X) of the arm (1).
