(54) **Name bearing plate provided with quick locking means for locking the outer push-buttons**

(57) The present invention relates to a name bearing plate provided with quick locking means for locking the outer push-buttons, which comprises a plate element including a plurality of windows for receiving cor-

responding name bearing glass elements, adjoining holes for receiving corresponding pushbuttons.

The main feature of the invention is that the name bearing glass elements define quick coupling means for quickly locking the body of the pushbutton.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 97 83 0213

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
