(54) Improved emergency luminaire

(57) The luminaire is made up of the three classic components, namely a built-in box, a components support fixable within the box and a frontal cover shade, and is particular in that the components support is mounted on or fixed to the box by means of elements that enable the positioning of the actual components support with respect to the box to be adjusted, offsetting the misalignments arising upon the built-in box being fitted, and the components support will therefore take up the most suitable relative position with respect to the box, in order that upon the shade being mounted no misalignments or clearances are visible between the shade and the wall.
