(54) **Anti-pilferage device**

(57) The present invention is directed to an anti-pilferage display device. The device comprises upper and lower bars which are parallel to each other. The lower bar contains a 90° upward bend at its outer end while the upper bar has a tab holder for product identification

or other information at its outer end. The upper and lower bars may be one continuous rod which is bent at its inner end. Means for affixing the bar to the store wall or shelf are provided at the inner end of the bars. Items being displayed hang on the lower bar.
