(54) Adjustable device for coupling electronic labels to shelves and the like

(57) An adjustable device for coupling to shelves and the like an electronic label, including a solar cell (C) which feeds an LCD display (D) and the electronic control circuits therefor, includes a first plate (1) and a second plate (2) mutually hinged along a side thereof through a joint (3), each plate (1, 2) being provided with a coupling element (4) arranged along a side opposite to the hinge side as well as with an inner cavity suitable to receive said solar cell (C) and said display (D) respectively. The joint (3) is obtained by forming along the facing sides of the two plates (1, 2) three complementary hollow lugs (5, 6) connected by a hollow transverse pin (7).

CATEGORY OF CITED DOCUMENTS

X : particularly relevant if taken alone
Y : particularly relevant if combined with another document of the same category
A : technological background
O : non-written disclosure
P : intermediate document

T : theory or principle underlying the invention
E : earlier patent document, but published on, or after the filing date
D : document cited in the application
L : document cited for other reasons

& : member of the same patent family, corresponding document
