(54) **Modular radiator**

(57) A radiator, specifically a household radiator, of the type consisting of a plurality of metal heating elements, each one formed by manifold elements and at least one radiant element, which are obtained separately and then connected together. According to the invention, the radiant element (6) is connected with the manifold elements (5) by a male-female coupling and mechanical means (17,22) are provided, which prevent the female acting element (23 or 15) to withdraw from the male acting element (15 or 23).

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 97 11 8521

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
