(54) **Device and method for lamination pressing**

(57) The invention relates to a system for automatic lamination pressing in which the laminated wood is placed in one of several press sections (3) which are

moved in an endless path. The present invention allows automated production of glulam without using e.g. HF fields for the curing of the glue used.

ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.

EP 97 20 2705

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
