(71) Applicant: **Lassovsky, Leon Alejandro**
41013 Sevilla (ES)

(54) **Luminaire system with redirectionable reflectors**

(57) The luminaire system comprises a general support (1) on which an illumination lamp is placed, assembled on a connection device (4) attached to said support (1), on which a series of reflectors (3) are in turn assembled, arranged parallel to the illumination lamp, said reflectors (3) being associated to rotating devices (2) which mesh with a rod or axis (8) activated by means of an external element (6), complemented with fixed reflectors (5-5'), all this in such a manner that the user can easily modify the direction of the light reflected on the reflectors (3), before, during and after the installation "in situ" of the luminaire. The variation in the direction of the light reflected, is conducted by means of the activation of rotating devices (2) to which the reflectors (3) are associated.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 97 50 0193

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
