(54) **Injector test apparatus**

(57) An injector test apparatus comprises a collection device (10) arranged to collect fluid delivered by a test injector (12). The collection device (10) communicates through first and second three-way valves (16,20) with a metering device (24). The metering device (24) is arranged such that, when fluid is supplied thereto through the first three-way valve (16), fluid is displaced from the metering device (24), causing fluid to be displaced through the second three-way valve (20), to a fluid reservoir (44), and vice versa.
