(54) **Apparatus for cleaning a broom head**

(57) The invention relates to an apparatus for cleaning broom brushes or similar.

According to the invention, said apparatus comprises a supporting member (1), in the form of a plate, or similar, provided with a plurality of projecting elements (2), like points, edges, or threads, in a predetermined arrangement and at a predetermined distance from each other, being meant to interact with brushes, for removing the material caught therein by scraping.

The invention also relates to a container, provided with said apparatus, for holding the material removed from brushes, having the additional function of a dust-pan.
