**I-42016 Guastalla (IT)**

(54) **Gas cooker or cooking hob with a burner having two individually controlled concentric flame crowns**

(57) A gas cooker or cooking hob includes at least one burner with two concentric flame crowns, an inner crown (1) and an outer annular crown (2), with a first delivery tube (9) supplying the outer crown (2) and a second delivery tube (10) supplying the inner crown (1), the gas flow in each of said delivery tubes (9, 10) being

adjusted in an independent manner through a relevant tap. This arrangement provides complete freedom of adjustment of the flames, since each crown (1, 2) of the burner can be adjusted individually from a minimum to a maximum, whereby both the power and the flame distribution of the burner can be changed at will.

**ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.**

EP 98 83 0284

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.  
The members are as contained in the European Patent Office EDP file on  
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
