(54) **Machine for gluing and folding edges of materials in sheet form and the like, particularly of shoe upper parts made of leather or the like, with automated actuation**

(57) A machine for folding and gluing edges of materials in sheet form, particularly leather parts of shoe uppers, comprising a working surface and mechanical elements such as a foot (6) for folding the edge of the part being treated, a guide (8) for the abutment of the part to be treated, a folding element (13) and a cutting blade (15), a main motor for the actuation

of the machine and a microcomputer for storing parameters related to the operation of the machine being further provided, the particularity of the machine being that it is equipped with independent actuations for the blade (15) which are synchronized with the main motor of the machine.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 98 11 7206

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
