(54) **Mounting for holding a tool on a user and use of such a mounting**

(57) The invention relates to a mounting for holding a tool on a user. The mounting comprises a first part (1) which, by means of a belt or other strap, is intended for being secured on the user and a second part (11) which, by means of a band or other strap, is intended for being secured to the tool or which constitutes an integrated part of the tool. The first part (1) comprises a clip (5) which in a first situation of use is intended for engagement with a brace (14) on the other part. In a second situation of use the brace is intended for being out of engagement with the clip so that the tool with the other part secured thereto may be used independently of the first part.
