(54) **A plug**

(57) The invention relates to a plug (1) for providing electrical connection for at least two devices (not shown), comprising a fixed (2) and a movable (3) connector. The plug (1) has a body (4) with a tubular socket at one end comprising the fixed connector (2) and an extension (10) for plugging into an existing cigar or cigarette port of a vehicle. The movable connector (3) comprises a spool (6) rotatably mounted on and rotatable about the port (2). The movable connector is in the form of an electrical lead with a plug (5) on the opposite end to that connected to the body (4) and can be unwound by rotation of the connector to a desired amount for connection with a second appliance, the first connector (2) making connection with a first appliance. There is an elastic strap (7) for retaining the lead in position.
