80469 München (DE)

(54) **An inflatable flying toy**

(57) An inflatable flying toy made of plastic membrane. The flying toy is formed with several inflatable air passages communicated with each other. After inflated, the air passages are expanded to serve as a support frame for stretching and supporting the flying toy into a kite form. At predetermined positions of the air passages are disposed latch holes or wing holes connect-

ing with a hook injection member or tied with a pull string. The hook injection member can be hooked with a catapult which is able to resiliently inject the flying toy as a glider. A pull string can be tied with the flying toy to control the flying or floating direction of the kite by pulling.

The present search report has been drawn up for all claims			TECHNICAL FIELDS SEARCHED (Int.Cl.6) A63H
Place of search THE HAGUE		Date of completion of the search 25 January 2001	Examiner Vanrunxt, J
CATEGORY OF CITED DOCUMENTS X : particularly relevant if taken alone Y : particularly relevant if combined with another document of the same category A : technological background O : non-written disclosure P : intermediate document T : theory or principle underlying the invention E : earlier patent document, but published on, or after the filing date D : document cited in the application L : document cited for other reasons & : member of the same patent family, corresponding document			

EPO FORM 1503 03 82 (P04C01)

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 99 10 6886

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
