(54) **Double-pocket extraction unit**

(57) The double-pocket extraction unit comprises a pouch (4), at least one label (6) and at least one string (8) interconnecting the pouch and the label. The first and the second pocket are filled with the product to be extracted and interconnected at their bottom side via at least one transversely extending fold. The at least one string extends from the label to the top side of the pouch. The string further extends to an inner space of the first and second pockets. In the first and second pockets, the string extends via the transverse fold from the first pocket to the second pocket. The string can be partially pulled from the first and second pockets for compressing the pouch after extraction of its contents.

The present search report has been drawn up for all claims			
Place of search	Date of completion of the search	Examiner	
THE HAGUE	17 September 1999	Martin, A	
CATEGORY OF CITED DOCUMENTS		T : theory or principle underlying the invention E : earlier patent document, but published on, or after the filing date D : document cited in the application L : document cited for other reasons & : member of the same patent family, corresponding document	
X : particularly relevant if taken alone Y : particularly relevant if combined with another document of the same category A : technological background O : non-written disclosure P : intermediate document			

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 99 20 1168

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
