(54) **Support for radiating panels**

(57) A support for radiating panels of the type comprising an upright (10) with means (11) for resting on the ground or for cantilevered fixing and means for fixing to a radiating panel (14). The upright is adjustable and the means for fixing to the radiating panel comprise two mutually articulated elements (20, 21) which form respective shaped jaws between which a convection lamina (15) of the panel (14) can be inserted and locked. The jaws are associated by screw-type fastening means (31) which act at right angles to the articulation axis in a region available to the action of the user. One of the articulated elements (20) is rigidly coupled to the upright (10).
