(54) Vehicle head-lamp, particularly for a moped

(57) A vehicle head-lamp, particularly for mopeds, comprises a reflector including an upper portion (13s) and a lower portion (13i) defining separated ellipsoidal surfaces, having separated foci. The light source (S) associated with the head-lamp extends from one focus (F_i) of the lower portion (13i) of the reflector to a point inter-

mediate between said focus and a focus (F_s) of the upper portion (13s) of the reflector. At the front of the head-lamp there is provided an aspherical diverging lens (17) having an outer face with a plurality of cylindrical microlenses (22), for deviating downwardly the light rays directed above the horizon line passing through the optical axis of the head-lamp.

ANNEX TO THE EUROPEAN SEARCH REPORT ON EUROPEAN PATENT APPLICATION NO.

EP 99 83 0454

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
