(54) **Plastic moulded shoe bottom provided with small ducts for water and sand evacuation**

(57) The present invention relates to a plastic moulded shoe bottom, of the type provided with an insole on the upper part and a network of channels on the upper side, preferably in the proximity of the external

edge of the bottom, leading up to ducts with vertical axis affecting the whole thickness of the bottom; it being provided that the insole features a series of through holes with vertical axis, preferably aligned with the channels below.
