(54) **Textile suitable to ink jet dyeing and ink jet dyeing method**

(57) A textile, to which woolen particles are attached with or without a binder, is suitably used in ink jet dye printing using a dye ink. This textile allows vivid and clear patterns to be printed on the textile by an ink jet printer, while preventing blur, colour separation, interference fringes, and deterioration of dye density on the sur-

face of the textile. An ink jet dyeing method using such a textile includes the steps of applying a solution containing woolen particles with or without a binder onto a textile, drying the textile, printing a desired pattern on the textile by an ink jet printing technique using a dye ink, and applying heat treatment to the printed textile.
