(54) **Roller skate with elastic suspension means**

(57) Roller skate, in particular roller skate with in-line wheels, provided with independent elastic suspension means.

The wheels (11) are journaled in a bogie (13) that

is floating with respect to the frame (12) of the skate (10), and are associated to pairs of springs (24) that are compressed between the frame and the bogie.

The solution is more rational, simpler and more compact with respect to prior-art ones.
