**Chiba-shi, Chiba 261 (JP)**

(54) **High accuracy timepiece**

(57) A data input control section inputs a crown state detection signal from a crown state detection section, and determines how a crown is operated. When the operation of selecting a second rate fast/slow data input mode has been performed, the section controls an indi-

cation control section to cause the section to give indication for inputting rate fast/slow data. When the operation of inputting rate fast/slow data has been performed with respect to the crown, the rate fast/slow data specified by the operation is outputted to a data storage section.

**ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.**

EP 99 30 8470

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on  
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
