(54) Display apparatus

(57) The display apparatus 2 comprises a cascading display device 4 which defines three elongate channels 6, 8, 10 in which articles, for example magazines or newspapers, may be arranged and displayed. The display device 4 is supported by a support device 12 which extends between a rear wall 14, situated behind the device 4, and the display device and is arranged to support the display device against downwards movement. The support device includes a support flange 78 which extends into a gap defined between limbs 34, 36 of respective channels 6, 8. Support rods 16 extend between the wall 14 and the display device 4 and are arranged to space the display device 4 from the wall 14; to prevent the display device 4 from pivoting about the support device 12; and to add rigidity to the display apparatus. In another embodiment, a support device is provided which includes support flanges which extend into respective gaps defined between the first and second channels 6, 8 and the second and third channels 8, 10.

ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.

EP 00 20 0714

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
