(54)

Extendable aerial platform

(57) An extensible overhead platform destined to be connected to the end of a lifting boom, comprising:

on the smaller sides of the bottom wall (30) of the central section (24).

Each side section (26) can turn on an angle essentially equal to 90° from a lifted position to a lowered position, so that the platform (22) can assume a closed configuration for transportation and an open configuration for working.
