(54) Low temperature showcase

(57) A low temperature showcase having an air passage (7) provided in the bottom portion of a heat insulating body (2) with inner and outer air passages (5,6) therein in communication therewith. The air passage (7) has a double structure and is provided in the rear of the heat insulating body (2). A plurality of fans (11,12) are mounted in a casing (13) for supplying air to the outer and inner air passages (5,6) are provided in the bottom air passage (7) and arranged across the width thereof

in substantially the same plane. A partition wall (17) is provided in the outlet from the casing (13) housing said fans (11,12). An outer air passage opening (18) is provided in the wall (17) through which air is blown from each fan (11) into the outer air passage (5). An inner air passage opening (19) is provided in the wall (17) through which air is blown from each fan (12) into the inner air passage (6). At least the outer air passage opening (18) is formed in substantially all of the area in a longitudinal direction of the wall (17).

ANNEX TO THE EUROPEAN SEARCH REPORT ON EUROPEAN PATENT APPLICATION NO.

EP 00 30 2635

This annex lists the patent family members relating to the patent documents cited in the above–mentioned European search report. The members are as contained in the European Patent Office EDP file on The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
