(54) **Fan hub**

(57) The arrangement is formed by the combination of a number of standardised parts such as a sleeve (33), a back half casing and a front half casing (21,22), both being generally equal to one another and having a semi-cylindrical configuration with no upper base. From the edge (24) thereof a flap (25) is formed provided with a number of openings (26) and flanges located at the side surface thereof. Said half casings (21,22) may be coupled through clamping means provided at the base thereof by combining bores (27), rods (30) and nuts (32) tightly clamping them in such a way that the skirt (10'a) of said blades (10') is located therein, which blades (10') are manufactured in a conventional way. However, said base is provided with such a skirt which finishes at the only free end thereof in a ringed rim (10'b). The skirt and the rim (10'b) are accommodated in a bracket (38) which is clamped between the above mentioned back and front half casings (21,22).

FIG. 2.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 00 50 0042

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
