(54) **Lighting fixture with high antiglare properties**

(57) A lighting fixture with high antiglare properties, comprising an outer enclosure (21, 31) capable of being mounted on a wall or ceiling, associated with at least one profiled reflecting element, (40,50) so as to outwardly diffuse a light flux originating from at least one

light source (12). The peculiarity of this invention consists in that the lighting fixture provides at least one reflecting antiglare surface (13) opposed to the light source (12) and placed inside the profiled reflecting element (40, 50) in such a position that the light source (12) is not directly visible.
