(54) Distribution manifold for thermal system with forced circulation

(57) A distribution manifold for forced circulation heating system comprising a first set of connections (27, 42) apt to associate it with delivery and recirculation lines (4, 10) of the first part of the heating system (3) which presents radiant ducts (8) built in walls and a sec-

ond set of connections (39, 40, 41) apt to associate it with delivery and recirculation lines (16, 17) of the second part of the heating system (12) which presents external radiators (14). According to the present invention said distribution manifold (2) is obtained as a single monobloc (22).

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 00 20 2307

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
