(71) Applicant: **FAAC S.p.A.**
I-40069 Zola Predosa (Bologna) (IT)

(54) **Manually resettable device for emergency release of automatic door moving mechanism**

(57) A disconnecting device (10) designed to be placed between an automatic door moving mechanism (14) and the door to allow mutual disconnection thereof comprises a first part (11) and a second part (12) designed with one of them to be permanently constrained

to the automatic mechanism and the other to the door. Between the former and the latter parts are placed releasable mutual constraint means (15) which are manually resettable by means of resetting means (29) after a disengagement operation for automatic reconnection upon closing of the first and second parts.
