(54) **Sheets with adhesive system for electronic printing**

(57) Sheets with adhesive system for electronic printing comprising a card-like special paper sheet (1) with a smooth face and a siliconized back, where there is applied a support paper sheet (2) of which the contact face (3) is adhesive, having two adjacent longitudinal areas (4) and (5) delimited by half-cuts (6) and subdivided by transversal half-cuts (7), defining smaller areas which specify the visit cards (8) to be printed, having limited by half-cuts (11) areas (10) of the support paper which correspond to the areas (4) and (5), with smaller width than these, resulting in two thin side "strips" (12) superposed to the distal borders of the visit cards, having on the upper extremity of the areas (10) one "tab" (13) used to remove those areas of the support paper and consequently to release the visit cards after printing.
