(54) **Support device for bed**

(57) Object for the invention is a support appliance for bed, into which support appliance belong the frame part (2, 16, 18) and the attaching parts, with the help of which the support appliance can be attached to the bed, its side framings or the framework of the bed, and a support (19) to be fastened on the support appliance, which is to be used as a support when getting into bed or getting out of bed. To the support appliance in accordance with the invention belong a tube part (3, 4) to be placed underneath the bed and an adjusting part (6) to be attached to the tube part for fastening of the tube part on one side of the bed, and the frame part is attached detachably on one end of the tube part (3, 4), to the appliance belongs a support part (1) to be attached to the frame part and to the bed, into which the support can be attached detachably, and a quick-release fastening device for attaching of the support part to the frame part.
