(54) **Set of differently shaped tesserae**

(57) Procedure for the realization of surfaces made by every kind of suitable material to coating by combination of five elements: three right-angled isosceles triangles with three different dimensions, one square and one rhomboid.

These five elements can be reduced four, replacing the rhomboid by two small right-angled isosceles triangles putting near their hipotenuses.

By different combination of these elements it is pos-

sible to obtain innumerable compositional solutions, and it is possible to obtain innumerable compositional solutions even leaving the same disposition of the elements but changing the colours.

There is a relationship between the dimensions of the single elements, so fixing the dimensions of one of them, they are fixed automatically those of the others elements.

The tassellas are cut industrially.

**ANNEX TO THE EUROPEAN SEARCH REPORT  
ON EUROPEAN PATENT APPLICATION NO.**

EP 00 12 7336

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on  
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
