(54) **Client-server system for three-dimensional face make-up simulation**

(57) It is an object of the invention to provide a three-dimensional beauty simulation client-server system which is capable of handling a user's face in a three-dimensional fashion and of providing more realistic beauty simulations. This system comprises a shop-based client that obtains and transmits three-dimensional shape data regarding a user, and a server comprising a makeup simulation unit that receives and stores the three-dimensional shape data from the shop-based client and carries out makeup simulation based on the three-dimensional shape data in response to requests from the user, and a data control unit that analyzes the user's operation record and generates administrative information.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 01 30 2391

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
