(54) Weighted grip

(57) The invention provides a golf club, a putter, wherein a shaft is fixed within a large diameter grip by means of inserts which are in the form of weighting elements. In one embodiment the weighting element is in

the form of an end cap at the end of the grip thereby forming a balancing moment to counter the force acting at impact. In another embodiment weighting elements are provided at both ends of the grip to provide a "high-inertia" grip.

CATEGORY OF CITED DOCUMENTS			
X : particularly relevant if taken alone Y : particularly relevant if combined with another document of the same category A : technological background O : non-written disclosure P : intermediate document			
T : theory or principle underlying the invention E : earlier patent document, but published on, or after the filing date D : document cited in the application L : document cited for other reasons & : member of the same patent family, corresponding document			

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 01 30 4012

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on. The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
