(71) Applicant: **Sigarth AB
330 33 Hillerstorp (SE)**

(54) **Radiator mount**

(57) A radiator mount for securing a radiator (2) on, for example, a wall (1) includes a rail (3) and a runner (12). The rail (3) is fixable on the wall (1) and has a first (4) and a second (5) anchorage device for cooperation with edge regions (6, 7) of the radiator (2). The runner (12) is movably connected to the rail (3) at a first end of the rail (3). The runner (12) carries the first anchorage device (4) and is positively actuated towards the second anchorage device (5). In the runner (12), there is a locking space which is defined in one direction by a surface on the rail (3), and in an opposing direction by a surface on the runner (12). The two surfaces converge in a direction towards the second anchorage device (5). Between the surfaces, there is a locking element which is positively actuated towards the second anchorage device (5).

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 01 20 1683

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
